OVERVIEW

OVERVIEW

All information concerning the number of patients in the various treatment modalities, and the number of transplants performed, was gathered through use of a data collection form known as the End-Stage Renal Disease Facility Survey, Form HCFA-2744. For 1983 the Facility Survey was completed twice, the first time to cover the first six months of calendar year 1983 (January 1, 1983 through June 30, 1983), and the second time to cover the last six months of the year (July 1, 1983 through December 31, 1983). A copy of the most recent distributed Facility Survey and the instructions for completion of the form are included in the appendix of this publication. The two survey periods are displayed separately in this publication.

The "Summary Tables" are representative of the last survey period for 1983. During this period a total of 1,255 facilities which perform some form of maintenance dialysis, and 160 hospitals which perform kidney transplants, were requested to complete a Facility Survey. The rate of compliance with that request was 100 percent.

The number of facilities surveyed does not equal the number of ESRD certified facilities in the country. Some end-stage renal disease (ESRD) hospitals were

excluded from consideration because they provide only backup dialysis on an acute basis, rather than routine maintenance dialysis. Other facilities were not requested to complete a Facility Survey because they were so recently certified there was not sufficient time to include them in the survey population.

Presentation of Data

The information in these tables is compiled and displayed by each of the 32 ESRD Networks. A map of the networks and network designation as prescribed in the Federal Register appear in the appendix section of this publication. The tables reflect activity for the entire specified survey period, unless otherwise noted.

Veterans Administration Dialysis Statistics

Also included in this publication is information which we received from the Veterans Administration concerning their dialysis statistics for the period ending December 31, 1983.

^{1/} Includes 3 home dialysis patients from VA's without dialysis units

^{2/} Includes 1 home dialysis patient from VA's without a dialysis unit

GLOSSARY

GLOSSARY OF TERMS

The items appearing in this glossary are intended to assist the reader by supplying operational definitions of the terms used in the 1979 Facility Survey Tables.

Back-up Dialysis - Dialysis provided, under a written agreement, by one facility for another facility.

Cadaveric Transplant - The kidney that was transplanted was obtained from a deceased donor.

Chronic Maintenance Dialysis - Dialysis which is regularly furnished to an ESRD patient in either a hospital-based, non-hospital based, or home setting.

Continuous Ambulatory Peritoneal Dialysis (CAPD) - A type of peritoneal dialysis whereby the patient dialyzes at home, using special supplies, but without the need for a machine.

Dialysis - A process of maintaining the chemical balance of the blood when the kidneys have failed, specifically a process by which dissolved substances are removed from a patient's body by diffusion from one fluid compartment to another across a semi-permeable membrane. The types of dialysis currently used are hemodialysis, peritoneal dialysis, and continuous ambulatory peritoneal dialysis (CAPD).

Dialysis Treatments - The number of treatments performed for ESRD patients.

Disposition of Cadaveric Kidneys - The final disposition of acquired cadaveric kidneys.

End-Stage Renal Disease (ESRD) - That stage of renal impairment which is irreversible and permanent and requires dialysis or kidney transplantation to ameliorate uremic symptoms and maintain life.

ESRD Facility - A supplier of health care services that is approved to furnish at least one specific ESRD service.

ESRD Network - An approved organized group of ESRD facilities in a designated area which, by their type and location and because of local referral patterns, collectively furnish the necessary care for ESRD patients in the population served.

ESRD Service - The type of care or services furnished to an ESRD patient, such as transplantation or dialysis services.

Hemodialysis - A method of dialysis in which blood from a patient's body is circulated through an external device or machine and thence returned to the patient's bloodstream. Such an artificial kidney machine usually is designed to remove fluids and metabolic end products from the bloodstream by placing the blood in contact with a semi-permeable membrane which is bathed on the other side by an appropriate chemical solution referred to as dialysate.

Home Patients - Those patients who maintain their own dialysis equipment at home and perform their own treatment alone or with the assistance of a helper.

In-Unit Patients - Those patients whose dialysis is performed in a facility by staff at the facility, or who dialyze themselves in a facility.

Inpatient Dialysis - Dialysis which, because of medical necessity, is furnished to an ESRD patient on a temporary inpatient basis in a hospital.

Living Transplants - The kidney that was transplanted was obtained from a living person, usually a blood (genetic) relative of the ESRD patient.

Lost to Follow-up (LTFU) - A category of patients whose current status is unknown to the facility which at one time had been dialyzing/following the patient.

Medical Information System (MIS) - A system which contains medical information on patients and the services that they have received during the course of their therapy. The ESRD Medical Information System is an automated system of medical records which deals primarily with current Medicare eligible ESRD patients but also maintains historical information on persons no longer classified as ESRD patients by reason of death or successful transplantation.

Number of Dialysis Treatments Given - The number of times dialysis machines were used to provide patient treatments.

Number of Facilities by Number of Transplants - The number of facilities performing a specified number of transplants for the survey period.

Number of Facilities Reporting - The number of operational ESRD facilities that provided the specific data needed to produce a given table.

Number of Facilities Surveyed - The number of operational ESRD facilities which received a Facility Survey for completion.

Number of Patients Dialyzed - The number of individual patients for whom dialysis treatments were provided.

Number of Patients Completing Self-Dialysis Training Course - The number of patients who have completed a certified training program teaching them to perform their own renal dialysis treatments in the home or on an outpatient basis alone or with the assistance of a helper.

Patients Awaiting Transplant - The number of patients dialyzing at or being followed by a facility who are (1) medically able to receive a transplant, (2) have given consent for a transplant, and (3) are on an active transplant list.

Peritoneal Dialysis - A procedure which introduces dialysate into the abdominal cavity to remove waste products through the peritoneum (a membrane which surrounds the intestines and other organs in the abdominal cavity). It functions in a manner similar to that of the (artificial) semi-permeable membrane in the hemodialysis machine.

Renal Dialysis Facility - A unit which is approved to furnish dialysis services to ESRD patients. For purposes of these Tables, this category also includes the Renal Dialysis Center, which is a hospital unit approved to furnish the full spectrum of diagnostic, therapeutic (including patient dialysis furnished directly or under arrangement) and rehabilitative services, except renal transplantation, for the care of ESRD dialysis patients.

Renal Transplant Center - A hospital unit which is approved to furnish direct transplantation and other medical and surgical specialty services for the care of the ESRD transplant patients, including inpatient dialysis furnished directly or under arrangement.

Restarted Dialysis - A category of ESRD patients who, at one time, were on chronic maintenance dialysis, left that treatment category for reasons other than a transplant (e.g., recovered kidney function), then returned to dialysis.

Self-Dialysis Patients - Patients who have been trained in dialysis techniques and dialyze themselves in a dialysis facility or at home without professional assistance. Patients who are entirely responsible for administering their own dialysis treatments without professional support (except in emergency situations) are in this category.

Staff-Assisted Dialysis - A dialysis setting in which the patient is dialyzed at a facility by staff at that facility.

Started for First Time Ever - A category of ESRD patients, who, having been newly diagnosed as having ESRD, began their first chronic maintenance dialysis at the reporting facility; or, newly diagnosed ESRD patients who, after being stabilized on dialysis, completed a course of self-dialysis training and began dialyzing at home or self-dialyzing at the facility.

Transient Patients - Patients who are treated by facilities episodically (less than 51 percent of the survey period); e.g., vacationers.

Transplant - Refers to the number of kidney transplant operations performed, not necessarily to the number of individuals receiving a transplant. Unless otherwise specified, entries in this category include both living and cadaveric donor sources.

Transplants Performed - The number of kidneys transplanted by source type; i.e., living or cadaveric.

Treatment Setting - The type and location of the dialysis treatment being performed; i.e., self-dialysis, self-dialysis training, staff-assisted dialysis, home dialysis.

END-STAGE RENAL DISEASE MEDICAL INFORMATION SYSTEM
ESRD FACILITY SURVEY

FOR THE PERIOD

PART THREE

REMARKS:

This report is required by law (42 USC 426, 42, CFR 495.2133). Individually identifiable patient information will not be disclosed except as provided for in the Privacy Act of 1974 (5 USC 552c, 45 CFR, Part 59).
Form HCF-274 (11-83) Formerly HCF-400-8

ESRD FACILITY SURVEY
INSTRUCTIONS FOR COMPLETION

REPORTING RESPONSIBILITY

The ESRD Facility Survey is designed to capture only a limited amount of information concerning each Federally approved renal facility's operation. It is not intended to yield information on the full range of ancillary services or activities, e.g., referrals, graft outcome, etc. These concerns are more appropriately and validly addressed by the network in supplemental requests or through other segments of the Medical Information System.

Every facility/center certified by Medicare to provide services to ESRD patients must furnish the information requested in the ESRD Facility Survey (42 USC 426; 20 CFR 405, Section 2133).

Survey Period

The Facility Survey is completed semiannually. The survey periods are January 1 through June 30, and July 1 through December 31.

Unless specified otherwise, all data entered on the Facility Survey is to cover the entire survey period. The form should be completed and forwarded to the local ESRD Network, at the following address:

GENERAL INSTRUCTIONS

For purposes of this document, the word "facility" will be used interchangeably when referring to renal dialysis facilities, renal dialysis centers, or renal transplant centers, as applicable.

All patient and treatment counts requested are to include only the diagnosed chronic ESRD population; no reversible failure patients or treatments may be counted.

All diagnosed chronic ESRD patients treated at the facility should be counted and reported as (1) regular, continuing caseload (field 03); (2) added to the regular caseload (fields 04A through 07B); (3) lost from the regular caseload (fields 08A through 13B); or (4) transient (field 34).

Transient, seasonal, temporary transfers for inpatient care or vacation are reported in two ways. The usual (3 months, 51 percent or more of treatment/supervision) facility counts the patient as part of regular caseload; the facility that treats/supervises the patient episodically (less than 3 months or less than 51 percent) counts the patient (one time only if multiple transfers have occurred) in field 34.

Inclusion of patients in counts should not depend on entitlement determination; newly diagnosed chronic unit admissions should be included, both for peritoneal or hemodialytic therapy and transplantation.

PART ONE

(FOR COMPLETION BY DIALYSIS UNITS ONLY)

I. PATIENT LOAD

Patients Receiving Care Beginning of Survey Period

Field 01: In-Unit. Enter the number of patients dialyzing in your facility at the beginning of the survey period. This number should reflect your "permanent" patient population; that is, those patients for whom your facility had ongoing medical responsibility for the routine care of the patient until he/she was formally transferred elsewhere. Therefore, this number should include those of your routine patients who were hospitalized or were in transient status away from your facility at the beginning of the survey period. (This number should equal the total of fields 14 through 20 from the previous survey submitted.)

Field 02: Home Enter the number of patients followed by your facility (that is, for whom your facility had the major medical responsibility) who were dialyzing at home (hemodialysis, peritoneal dialysis, or continuous ambulatory peritoneal dialysis) at the beginning of the survey period. (This number should equal the sum of fields 21 through 23 from the previous survey submitted.)

Field 03: Total. Enter the sum of fields 01 and 02. This is to equal the number of patients on your facility's register at the beginning of the survey period. (This number should be the same as that reported in field 24 from the previous survey submitted.)

Additions During the Survey Period

NOTE: This section requires counts for additional in-unit and home dialysis patients accepted during the survey period. A PATIENT SHOULD NOT BE COUNTED IN MORE THAN ONE FIELD as an addition in fields 04A through 07B. Count them in the field which describes the last status if more than one is applicable.

Newly Diagnosed Patients:

Field 04A: In-Unit--Started for the First Time Ever. Enter the number of newly diagnosed ESRD patients who were admitted to your facility as chronic maintenance dialysis patients for the first time ever during the survey period. This is a count of patients who have begun their initial course of maintenance dialysis therapy at your facility during the survey period. Do not include patients who transferred to your facility from another dialysis facility; that data is to be reported in field 06A.

Field 04B: Home--Started for First Time Ever. Enter the number of newly diagnosed ESRD patients who, after being stabilized on dialysis, successfully completed a course of self-dialysis training and began home dialysis (their initial course of dialysis after training) during the survey period. If they are still in training at the end of the survey period, report them in field 04A.

Restarted Dialysis:

Field 05A: In-Unit--Restarted. Enter the number of patients who restarted in-unit dialysis during the survey period; e.g., persons who had temporarily recovered kidney function, discontinued dialysis, or had been lost to follow-up and have since restarted routine in-unit dialysis.

Field 05B: Home--Restarted. Enter the number of patients who restarted home dialysis during the survey period. These are patients who had temporarily recovered kidney function, discontinued dialysis, or had been lost to follow-up and have since restarted regular home dialysis.

II. Transferred From Another Facility:

Field 06A: In-Unit--Transferred from Other Dialysis Unit. Enter the number of patients admitted to your facility who were formally transferred from another facility during the survey period and who are continuing a regular course of dialysis at your facility.

Field 06B: Home--Transferred from Other Dialysis Unit. Enter the number of home patients who were formally transferred by another facility during the survey period to your unit for ongoing medical supervision and responsibility.

Returned After Transplantation:

Field 07A: In-Unit--Returned After Transplantation. Enter the number of patients who returned to in-unit dialysis during the survey period after a transplant failure.

Field 07B: Home--Returned After Transplantation. Enter the number of patients who returned to home dialysis during the survey period after a transplant failure.

Losses During the Survey Period

NOTE: These fields describe losses to your facility of both in-center and home dialysis patients that occurred during the survey period. A PATIENT SHOULD NOT BE COUNTED IN MORE THAN ONE FIELD from field 08A through 13B. For purposes of this survey, "in-unit" includes patients who routinely dialyzed in-unit at the time of loss to the reporting facility, and "home" includes patients who routinely dialyzed at home at the time of loss to the reporting facility. Count patients in the field which describes the last status if more than one is applicable.

Deaths:

Field 08A: In-Unit--Deaths. Enter the number of in-unit dialysis patients who died during the survey period. (These deaths must be shown here by the facility if the patients were reported in fields 01, 04A, 05A, 06A, or 07A.)

Field 08B: Home--Deaths. Enter the number of home dialysis patients who died during the survey period. (These deaths must be shown here by the facility if the patients were reported in fields 02, 04B, 05B, 06B, or 07B.)

Recovered Kidney Function:

NOTE: These are diagnosed chronic renal failure patients who recovered renal function.

Field 09A: In-Unit--Recovered Kidney Function. Enter the number of patients who recovered kidney function and ceased chronic ESRD in-unit dialysis during the survey period.

Field 09B: Home--Recovered Kidney Function. Enter the number of patients who recovered kidney function and ceased chronic home ESRD dialysis during the survey period.

Transplanted:

Field 10A: In-Unit--Received Transplant. Enter the number of patients who received a kidney transplant and left the in-unit dialysis program during the survey period.

Field 10B: Home--Received Transplant. Enter the number of patients who received a kidney transplant and left the home dialysis program during the survey period.

Transferred Out:

Field 11A: In-Unit--Transferred to Other Dialysis Unit. Enter the number of in-unit dialysis patients who permanently transferred to another dialysis facility for their ongoing dialysis during the survey period; that is, those patients whose ongoing, routine medical supervision became the responsibility of another dialysis facility.

Field 11B: Home--Transferred to Other Dialysis Unit.
Enter the number of home patients who had been followed by your facility but who are now permanently followed by another home dialysis program.

Discontinued Dialysis:

Field I2A: In-Unit--Discontinued Dialysis. Enter the number of chronic patients who permanently discontinued dialysis (excluding those reported in fields 08A, 09A, 10A and 11A) who had been dialyzing in-unit during the survey period.

Field I2B: Home--Discontinued Dialysis. Enter the number of chronic patients who permanently discontinued dialysis (excluding those reported in fields 08B, 09B, 10B, and 11B) who had been dialyzing at home during the survey period.

Lost to Follow-Up:

Field I3A: In-Unit--Lost to Follow-Up (LTFU). Enter the number of patients who had been dialyzing in-unit who left your dialysis program during the survey period and whose current status is unknown to your facility (lost to follow-up). Do not include those reported in fields 08A, 09A, 10A, 11A, or 12A.

Field I3B: Home--Lost to Follow-Up (LTFU). Enter the number of patients, followed by your facility, who had been dialyzing at home who were removed from your facility's rolls during the survey period, and whose current status is unknown to your facility (lost to follow-up). Do not include those reported in fields 08B, 09B, 10B, 11B, or 12B.

Patients Receiving Care at the End of the Survey Period

NOTE: DO NOT COUNT A PATIENT IN MORE THAN ONE FIELD. Patients receiving care at the beginning of the survey period plus the additions during the survey period minus the losses during the survey period should equal the patients receiving care (remaining) at the end of the survey period. In terms of the survey form, this means that field 03 plus fields 04A through 07B minus fields 08A through 13B equals field 24.

Staff-Assisted Dialysis:

Field 14: Hemodialysis: Enter the number of patients who, at the end of the survey period, were receiving staff-assisted hemodialysis.

Field 15: Peritoneal Dialysis. Enter the number of patients who, at the end of the survey period, were receiving staff-assisted peritoneal dialysis.

In-Unit Self-Dialysis:

Field 16: Hemodialysis. Enter the number of in-unit self-hemodialysis patients as of the end of the survey period. Self-dialysis training patients are to be reported in field 18.

Field 17: Peritoneal Dialysis. Enter the number of in-unit self-peritoneal dialysis patients as of the end of the survey period. Self-dialysis training patients are to be reported in field 19.

Self-Dialysis Training:

Field 18: Hemodialysis. Enter the number of patients who are in a self-hemodialysis training program as of the end of the survey period. Patients are to be reported in this category only if the training is designed to enable them to perform their own self-dialysis in-unit or at home.

Field 19: Peritoneal Dialysis. Enter the number of patients who are in a self-peritoneal dialysis training program as of the end of the survey period. Patients are to be reported in this category only if the training is designed to enable them to perform their own self-dialysis in-unit or at home. This field should also include those patients who are training for CCPD (Continuous Cycling Peritoneal Dialysis).

Field 20: Continuous Ambulatory Peritoneal Dialysis (CAPD) Enter the number of patients who are in a CAPD training program as of the end of the survey period. Patients are to be reported in this category only if the training is designed to enable them to independently perform CAPD.

Home Dialysis

Field 21: Hemodialysis. Enter the number of patients who hemodialyze at home as of the end of the survey period.

Field 22: Peritoneal Dialysis. Enter the number of patients who are on home peritoneal dialysis as of the end of the survey period. This field should also include CCPD patients.

Field 23: Continuous Ambulatory Peritoneal Dialysis (CAPD). Enter the number of patients who are on CAPD as of the end of the survey period.

Total:

Field 24: Total. Enter the total number of patients on your facility's register at the end of the survey period (the sum of fields 14 through 23 equals field 24).

Patient Eligibility Status--End of Survey Period

NOTE: Fields 25 + 26 + 27 should equal the total number of patients at the facility at the end of the survey period (this should be the same number as that in field 24).

Field 25: Currently Enrolled in Medicare. Enter the number of patients at the end of the survey period who were enrolled in Medicare.

Field 26: Medicare Application Pending. Enter the number of patients at the end of the survey period who had Medicare applications pending.

Field 27: Non-Medicare. Enter the number of patients at the end of the survey period who were not enrolled in Medicare and who did not have Medicare applications pending.

Patients Who Shifted Status During Survey Period:

NOTE: The numbers in fields 28A and 28B reflect patients who changed their dialysis treatment site during the survey period. These numbers are "independent" in the sense that they are not included with the "Additions" (fields 04A through 07B), nor are they included among the "Losses" (fields 08A through 13B).

Field 28A: Shifted Status (In-Unit to Home). Enter the number of patients who, during the survey period, shifted treatment status from in-unit dialysis (staff-assisted or self) to home dialysis.

Field 28B: Shifted Status(Home to In-Unit). Enter the number of patients who, during the survey period, shifted treatment status from home dialysis to in-unit dialysis (staff-assisted or self).

Home/Self-Dialysis Patients Completing Training

NOTE: The following section (fields 29 through 33) should be completed only by those facilities that have self-care training programs. Included in this section will be the number of patients who, during the survey period, successfully completed a course of self-dialysis training at the reporting facility which enabled them to self-dialyze in-unit or at home. Patients who were still in a self-dialysis training course on the last day of the survey period are not to be counted in these fields; that data is to be reported in fields 18 through 20. Unsuccessful trainees (those who did not go home or initiate self-care in a facility) are not to be counted here. (This count is a non-add, non-subtract count for caseload purposes.)

Hemodialysis

Field 29: Home Hemodialysis. Enter the number of patients who, during the survey period, successfully completed a course of self-dialysis training for home self-hemodialysis.

Field 30: In-Unit Self-Hemodialysis. Enter the number of patients who, during the survey period, successfully completed a course of self-dialysis training for in-unit self-hemodialysis.

Peritoneal Dialysis

Field 31: Home Peritoneal Dialysis. Enter the number of patients who, during the survey period, successfully completed a course of self-dialysis training for home self-peritoneal dialysis.

Field 32: In-Unit Self Peritoneal Dialysis. Enter the number of patients who, during the survey period, successfully completed a course of self-dialysis training for in-unit self-peritoneal dialysis.

Continuous Ambulatory Peritoneal Dialysis

Field 33: CAPD. Enter the number of patients who, during the survey period, successfully completed a course of self-dialysis training for continuous ambulatory peritoneal dialysis.

Transient Patients

Field 34: Transient Patients Treated During Survey Period. Enter the number of transient chronic patients who received care at your facility during the survey period. For purposes of this survey, a transient patient is one who does not intend to utilize the reporting facility for ongoing maintenance therapy. This field is a count of patients, not episodes of treatment. Therefore, if a patient is treated at a facility in February and again at that same facility in March, he/she is counted only once.

Field 35: Transient Patients--Number of Treatments During Survey Period. Using the definition of "transient patient" given above, enter the number of transient patient dialysis treatments (all dialysis settings) given during the survey period.

Dialysis Patients Awaiting Transplant

Field 36: Dialysis Patients Awaiting Transplant. Enter the number of patients dialyzing at your facility or dialyzing at home and followed by your facility who are awaiting transplant as of the last day of the survey period. These patients must: (a) be medically able, (b) have given consent, and (c) be on an active transplant list. This count should include all of your facility's patients who are on a transplant list at any transplant center—counted one time only.

TREATMENT LOAD

NOTE: The following section (fields 37 through 43) should reflect only treatments given to ESRD patients. Self-care training treatments should be reported only in fields 43 through 45. All such treatments, including those provided to transients, should be reported in fields 37 through 43, where appropriate.

Hemodialysis

Field 37: Inpatient Hemodialysis. Enter the number of inpatient hemodialysis treatments given to chronic dialysis patients and to patients pre-and post-transplant during the survey period. Self-care training treatments should not be included here. Also, in some unusual situations, a dialysis facility may, by written arrangement, provide the staff and/or equipment to perform inpatient treatments for chronic patients in hospitals. These treatments should only be reported by one of the facilities.

Field 38: Staff-Assisted Outpatient Treatments. Enter the number of in-unit staff-assisted hemodialysis treatments provided on an outpatient basis during the survey period.

Field 39: In-Unit Self-Care Outpatient Treatments. Enter the number of outpatient hemodialysis treatments performed by in-unit self-dialyzing patients during the survey period.

Peritoneal Dialysis

Field 40: Inpatient Peritoneal Dialysis. Enter the number of inpatient peritoneal dialysis treatments provided to chronic dialysis patients and to patients pre- and post-transplant during the survey period. Self-care training peritoneal treatments should not be included here. Also, in some unusual situations, a dialysis facility may, by written arrangement, provide the staff and/or equipment to perform inpatient treatments for chronic patients in hospitals. These treatments should only be reported by one of the facilities.

Field 41: Staff-Assisted Outpatient Treatments. Enter the number of in-unit staff-assisted peritoneal treatments provided on an outpatient basis during the survey period.

Field 42: In-Unit Self-Care Outpatient Treatments. Enter the number of outpatient peritoneal dialysis treatments performed by in-unit self-dialyzing patients during the survey period.

Self-Care Training Treatments

NOTE: These treatment counts should not be included in prior fields 37 through 42.

Field 43: Hemodialysis. Enter the number of hemodialysis training treatments given during the survey period.

Field 44: Peritoneal Dialysis. Enter the number of peritoneal dialysis training treatments given during the survey period.

Field 45: CAPD. Enter the number of CAPD training treatments given during the survey period.

Facility Operation

Hemodialysis:

Field 46: Average Patient Shifts Per Week. Enter the average number of hemodialysis patient shifts operated per week during the survey period (rounded to one decimal place). The number of machines operated by the facility is not a factor to be used in computing this figure. Example: 2 patient shifts Monday, Wednesday, and Friday plus 3 patient shifts Tuesday, Thursday, and Saturday = 15.0 patient shifts per week.

Field 47: Average Operating Days Per Week. Enter the average number of days per week this facility was in operation for hemodialysis during the survey period (this figure should be rounded to one decimal place).

Peritoneal Dialysis

Field 48: Average Patient Shifts Per Week. Enter the average number of peritoneal dialysis patient shifts operated per week during the survey period (rounded to one decimal place).

Field 49: Average Operating Days Per Week. Enter the average number of days per week this facility was in operation for peritoneal dialysis during the survey period (rounded to one decimal place).

Signatures

Part One of the Facility Survey requires signatures, as follows:

Completed by:

Enter the date completed and the name, title, and telephone number of the person who completed the Facility Survey for your facility. This person should be the individual who the ESRD network of HCFA can contact to discuss any information provided in the Facility Survey.

Verified by:

Enter the date verified and the signature and title of the facility's renal administrator.

PART TWO
(FOR COMPLETION BY TRANSPLANT FACILITIES ONLY)

L PATIENTS/TRANSPLANTS

Field 50: Patients Who Received Transplant at This Facility. Enter the number of patients who received a kidney transplant at your facility during the survey period. If a patient received more than one transplant at your center during the survey period the patient is to be counted only once. (The figure in field 50 should equal the sum of fields 51 + 52 + 53.)

Patient Eligibility Status/of Patients Transplanted During Survey Period. Fields 51-53 refer to those patients actually transplanted during the survey period. The total of fields 51 through 53 equals the same number reported in field 50.

Field 51: Currently Enrolled In Medicare. Enter the number of patients transplanted during the survey period who were enrolled in Medicare.

Field 52: Medicare Application Pending. Enter the number of patients transplanted during the survey period who had Medicare applications pending.

Field 53: Non-Medicare. Enter the number of patients transplanted during the survey period who were not enrolled in Medicare and did not have Medicare applications pending.

Transplants Performed at This Facility:

Field 54: Transplants Performed at This Facility--Living Donor. Enter the number of live donor kidney transplants performed at your center during the survey period.

Field 55: Transplants Performed at This Facility--Cadaveric Donor. Enter the number of cadaveric donor kidney transplants performed at your center during the survey period.

Field 56: Transplants Performed at This Facility--Total Fields 54 Through 55. Enter the sum of fields 54 and 55.

Patients Awaiting Transplant:

Field 57: Patients Awaiting Transplant--Dialysis. Enter the number of current dialysis patients actively awaiting transplant at your center as of the last day of the survey period. These patients must (a) be medically able, (b) have given consent, and (c) be on an active transplant list. This count is limited to individuals awaiting transplant at the reporting center.

Field 58: Patients Awaiting Transplant--Non-Dialysis. Following the procedures described above, enter the number of non-dialysis patients who are awaiting transplant as of the last day of the survey period. This is to include patients scheduled for transplant who have not yet initiated a regular course of dialysis.

II. CADAVER KIDNEYS

Enter the numbers of cadaver kidneys acquired by your center during the survey period in the appropriate blocks according to their source and disposition. Actual, rather than potential, acquisition is assumed.

Harvested at This Center:

Determine the number of cadaveric kidneys that were harvested at your center during the survey period that were:

Field 59: Transplanted at this center

Field 60: Sent to another center for transplantation

Field 61: Not used (discarded)

Field 62: Total of fields 59 through 61.

Cadaveric kidneys procured outside your center by a procurement team from your center are not to be included in these categories.

Obtained from Another Transplant Center/Organ Procurement Agency:

Determine the number of cadaveric kidneys that were harvested outside your center either at another approved transplant center or through an OPA that were:

Field 63: Transplanted at your center

Field 64: Sent to another center

Field 65: Not used (discarded)

Field 66: Total of fields 63 through 65.

Obtained from a Non-Transplant Hospital:

Determine the number of cadaveric kidneys that were harvested outside your center in a hospital not approved by Medicare as a transplant center that were:

Field 67: Transplanted at your center

Field 68: Sent to another center

Field 69: Not used (discarded)

Field 70: Total of fields 67 through 69.

These counts should include, where applicable, any kidneys harvested outside your center by a procurement team from your center.

Disposition of Cadaver Kidneys:

Cadaver Kidneys Transplanted at This Facility:

Field 71: Should equal the total of fields 59 + 63 + 67. This should be the same number that appears in Field 55. In situations where two kidneys from one cadaveric donor are transplanted to one patient, the total in field 71 can be greater than field 55. When this situation occurs, it should be annotated in Part Three (Remarks).

Cadaveric Kidneys Sent to Another Facility:

Field 72: Should equal the total of fields 60 + 64 + 68.

Cadaveric Kidneys Not Used

Field 73: Should equal the total of fields 61 + 65 + 69.

Signatures

Part Two of the Facility Survey requires signatures, as follows:

Completed by:

Enter the date completed and the name, title, and telephone number of the person who completed the Facility Survey for your facility. This person should be the individual who the ESRD network of HCFA can contact.

Verified by:

Enter the date verified and the signature and title of the facility's renal administrator.

PART THREE

You may include here any remarks or additional information you wish to supply concerning the information furnished on this survey.
